- Bidders should base their Bids on the basis of material and equipment specified in the Bidding and Contractors Documents. Such submittals shall document all the requirements of General Condition 6.05.
- Specification 13440 1.2.B.3 implies that the named system integrators were pre-approved; the intent of listing the integrators was to provide examples of firms that TST/ESC was reasonably confident were qualified to provide services and equipment as specified in the documents. Any firm used for the work will be "Approved" based on Qualification requirements of Section 1.4.C, in the Shop Drawing Submittal and Review Process.
